**ORDER APPROVING A NEW DEVELOPMENT SCHEDULE,
ADDING A WATER MANAGEMENT PLAN,
A LICENSING CONDITION AND AMENDING THE PERMIT**

WHEREAS:

1. Permit 17593 was issued to Redwood Valley County Water District, on April 9, 1979 pursuant to Application 24955.
2. A petition for an extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board (Board).
3. The permittee has proceeded with diligence and good cause has been shown for said extension of time.
4. Permittee, under the Board's Water Conservation Program, is considered an Urban water supplier and is therefore required to develop and implement an urban water conservation plan or actions. Therefore, Standard Permit Term 29B should be added to the permit.
5. Permittee under permit Condition 24, is required to provide data concerning storage facilities, and under permit Condition 26 is required to maintain daily records of the amounts and rates of diversions from Lake Mendocino. To facilitate licensing the project, in a timely manner, a condition should be added to this order directing permittee to consult with Division of Water Rights staff regarding these requirements.
6. Permit Condition 12 pertaining to the continuing authority of the Board should be updated to conform to Section 780(a), Title 23 of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Condition 8 of the permit be amended to read:

CONSTRUCTION WORK SHALL BE
COMPLETED ON OR BEFORE December 31, 1993 (0000008)

2. Condition 9 of the permit be amended to read:

COMPLETE APPLICATION OF THE
WATER TO THE PROPOSED USE
SHALL BE MADE ON OR BEFORE December 31, 2002 (0000009)

3. Condition 12 of the permit be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

4. Condition 31 is added to this permit as follows:

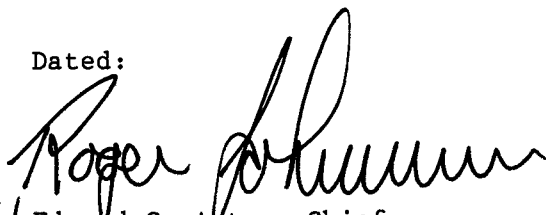

Permittee shall consult with the Division of Water Rights and develop and implement a water conservation plan or actions. The proposed plan or actions shall be presented to the State Water Resources Control Board for approval within one year from the date of this order or such further time as, for good cause shown, may be allowed by the Board. A progress report on the development of a water conservation program may be required by the Board at any time within this period.

All cost-effective measures identified in the water conservation program shall be implemented in accordance with the schedule for implementation found therein. (000029B)

5. Condition 32 is added to the permit as follows:

Permittee shall, within one year from the date of this order, consult with the Division of Water Rights and develop a plan, satisfactory to the Chief of the Division of Water Rights, for submittal of data and maps on the quantities of water directly diverted and diverted to storage under this permit. 1. WHEN, DURING THE PERIOD FROM OCTOBER 1 THROUGH APRIL 30, THE SURFACE LEVEL OF THE WATER IN LAKE MENDOCINO IS ABOVE THE CONSERVATION POOL AS ESTABLISHED BY THE U S CORPS OF ENGINEERS.

2. WHEN THE FLOW IN THE RUSSIAN RIVER AT THE CONFLUENCE WITH THE EAST BRANCH, EXCEEDS 150 CUBIC FEET PER SECOND, AND ONLY THEN AT A RATE NOT EXCEEDING SAID EXCESS, CEASING ALL DIVERSION WHEN THE FLOW IN THE RIVER IS 150 CUBIC FEET PER SECOND OR LESS. RIVER FLOWS SHALL BE MEASURED AT THE NEAREST U S GEOLOGICAL SURVEY GAGING STATION ON THE RIVER.
